

**An eco-friendly SCM company
focused on manufacturing and
logistics**

ecologitex

**eco-friendly
supply chain solutions**

ecologitex

Your eco-friendly supply chain management and manufacturing solution for organic products.

What we offer to you

Insisting on certified socio-economic working standards, ecologitex coordinates the manufacture of organic textiles, and the processing, packaging and labelling of organic food through our local offices in India, and we deliver your order anywhere in Europe or the USA. Our specialty, however, is our ability to offer very competitive production lead times.

We source and manufacture a variety of products using organic and recycled textile technologies:

Organic cotton and jute, and blends of bamboo and recycled PET fibres – poplin shopping bags, hoodies, t-shirts, polo shirts, track suits, tank tops, shorts, socks, baby clothing, underwear, lingerie and pyjamas

ecologitex also processes and packages organic food products with your customised labelling:

Spices chilli, ginger, turmeric, pepper, nutmeg, vanilla, saffron, cinnamon

Herbs amla, ashwagandha, tulsi, brahmi, galanga, mint, lemongrass, moringa

Coconuts coconut chips, milk, oil, cream, flour and desiccated coconut

Coffee both arabica and robusta

Fresh Products mango, sapota, grapes, jackfruit, ginger, turmeric

Purée alphonso mango puree, kesar mango puree

Jackfruit cubes, chunks, shreds, dehydrated chips

Oils & Extracts Japanese mint oil, lemongrass oil, lemon oil, lime oil, palmarosa oil, patchouli oil, peppermint oil, spearmint oil

Nuts and Seeds cashew nuts (w320 and w450)

Shopping bag production

ecologitex

ecologitex offers additional local services, such as TÜV SÜD lab testing, external quality management, supplier sourcing and logistics. As your OEM in India, we take responsibility for all sourcing transactions, as well as production and delivery. ecologitex is a one-stop buying platform for corporations, private labels, mail order houses, wholesalers and retailers for the manufacturing and delivering of organic products.

Our strengths

With a view to building a clean and efficient supply chain – with significantly reduced CO2 emissions – we provide resource management and cost-effective solutions through the utilisation of alternative service providers at both ends, upstream and downstream the supply chain.

The local ecologitex offices in India, Switzerland and the USA, build bridges between cultures and can engineer an efficient service for private-label manufacturing. The merchandisers within our network of factories have years of experience in realising technical packs, cutting patterns and measurement charts.

Our foundation is built on a logistics company that has operated for more than 30 years. We have direct access to a network of local service providers in India, which allows us to offer more-attractive prices. Our regular logistics operations can facilitate dependable and uncomplicated container shipments directly to your destination.

Our mission

ecologitex is actively devoted to reducing the environmental impact of the entire supply chain. Your order is managed and monitored from raw cultivation through all stages of logistics to the merchandise reaching its destination.

We only work with farmers who cultivate organic cotton and follow accepted basic social standards and strict environmental safeguards. ecologitex is committed to ensuring that our suppliers adhere to these guidelines and, through a meticulous certification process, their compliance is readily transparent.

Our partners in India manufacture under GOTS certified working conditions. We can also procure yarn that is spun using Controlled Union (CU) certified cotton fibres.

Janurvas

Janurvas is an association that is closely affiliated with ecogitex, and one which sources financing for rural area development projects in India. The goals of Janurvas are to create access to clean water and education and to reintroduce natural irrigation through rainwater harvesting. By replanting native foliage, which in turn, raises the water table, Janurvas helps to redesign landscapes, thereby creating natural habitats and biospheres. Essentially, making deserts green again.

Janurvas describes your current project through a series of videos that are linked to a QR code that is printed on the reverse of the shopping bags. This way, end consumers will see what has been achieved, and can follow the story of what they are supporting.

FOXLOADER

ecogitex is focused on supply chain strategies. We optimise container logistics through shipment consolidation. Our dedicated online logistics platform, foxloader.com, was developed to make booking your consignments a simple one-click operation.
